Rawalpindi, Pakistan

EDUCATION

National University of Modern Languages

Bachelor of Science in Computer Science

Islamabad

Sep 2020 – Jun 2024

EXPERIENCE

Associate Software Engineer

Aug 2025 – Present

Funavry Technologies

Islamabad

- Developing and maintaining enterprise-grade Angular applications, integrating RESTful APIs and implementing user interfaces from scratch to meet complex business requirements.
- Migrating legacy applications to modern Angular architecture, improving code maintainability, scalability and long-term performance.
- Building reusable, configurable UI components, including dynamic form builders and custom components.
- Collaborating closely with cross-functional teams, including backend engineers and QA, to deliver reliable, production-ready features across multiple client projects.
- Debugging and resolving complex UI and state-management issues to ensure robust, high-quality releases.

Junior Software Developer

Aug 2024 – Jul 2025

Code Frenetics (SMC-Private) Limited

Rawalpindi

- Responsible for doing frontend development using React.js, Next.js, Gatsby, Material UI, Typescript, HTML and CSS.
- Responsible for doing backend development using Nest.js, Express and PostgreSQL.
- Collaborate and coordinate with other team members to achieve individual as well as collective goals.
- Responsible to perform tasks assigned by the Team Lead.

React & Next.js Fellow

Jun 2024 – Sept 2024

Bytewise Limited

Remote

- Completed a remote fellowship in React & Next.js, gaining hands-on experience in modern web development
- Learned React.js from scratch, building interactive and dynamic web applications
- Translated Figma design into a fully responsive landing page using React & Bootstrap
- Built a Next.js website, learning about SSR, static site generation, and API routes

PROJECTS

AI Generated Fake Image Detection | *Python, Flask, React, Keras, Tensorflow, Heroku*

- Developed a detection system to identify AI-generated fake images using deep learning
- Created APIs using Flask and deployed the model and APIs on Heroku
- Integrated the APIs with a web application developed in React JS and deployed on Netlify
- Trained the model using three datasets: CASIA v1.0, CASIA v2.0, and the Defacto Inpainting dataset
- Implemented Grad-CAM to generate heatmap visualizations for prediction results

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frameworks: React JS, Next JS, Angular, Gatsby, Bootstrap, Tailwind CSS

Developer Tools: Git, GitHub, PostgreSQL, Postman, VS Code, Visual Studio

Libraries: RxJS, Material UI, Angular Material, PrimeNG

CERTIFICATIONS

- Responsive Web Design By **freeCodeCamp**
- Advanced Styling with Responsive Design By **Coursera**
- Interactivity with JavaScript and jQuery By **Coursera**
- Animation with JavaScript and jQuery By **Coursera**
- Introduction to CSS3 By **Coursera**
- Certified Python Elementry Programmer By **Python Career Trainers**
